time between 4pm and 7pm

**Winton Raceway
41 Fox Street, Winton**

Lightsource BP, supported by Urbis, is proposing to build a solar farm on 28 hectares of existing agricultural farmland located at 116 Lee Road, Winton. Lightsource BP is a global market leader in the development and long-term management of large-scale solar projects and smart energy solutions. The company is working to generate competitively priced, dependable, clean energy to supply Australian businesses and communities. Generating renewable energy locally will assist Victoria in meeting its renewable energy targets and reduce reliance on fossil fuels.

The proposed site has been chosen due to its proximity to the Glenrowan Terminal Station, its general flat topography and its capacity for natural screening.

The proposed site is being investigated for its suitability to retain agricultural use (such as sheep grazing), alongside a solar farm. Our team is looking to engage with the community to gain your unique perspective on the site, with your feedback helping to shape our proposal and the future Planning Application submission to Benalla Rural City Council.

Please join us at the community event.

If you are unable to attend the event but would like to discuss the project, please contact the team at Urbis on (03) 8663 4888 or at mokoanconsultation@urbis.com.au
