

# **SOLAR SYSTEMS AND ENERGY EFFICIENCY FORUM**

**TUESDAY 14<sup>th</sup> JUNE 7 - 8 PM**

**VENUE - Benalla Uniting Church, Meeting Room**

**(opposite Coles supermarket)**

Benalla Sustainable Future Group (BSFG) has been at the forefront of advocating that Benalla residents and businesses consider the benefits of installing solar systems, and undertaking energy efficiency measures on their buildings to reduce power consumption. We believe that both transition to renewable energy, and reduction in our current level of energy use, are vital steps to undertake to combat the effects of climate change.

**BSFG recognises that there are difficulties associated with undertaking these measures when the property involved is not owned by the occupier, so we are inviting you, as the tenant, to attend this forum, which we hope will open up some of the pathways to achieving energy saving measures.**

Topics to be covered include:

Solar system installation costs (for a range of system sizes)

Arrangements between landlord and tenant to enable works to be undertaken

Government rebate and other financial incentives

Low cost energy efficiency measures for buildings

The forum will conclude with a light supper and chance to engage further in conversation with each other about the issues covered.

Please RSVP to this invitation by email to [bsfginc@gmail.com](mailto:bsfginc@gmail.com) with your name and contact phone number, or by text message to [0438625638](tel:0438625638)
